Programming languages: Ruby, JavaScript
Frameworks: Ruby on Rails
Web technologies: Docker, Kafka, Sidekiq, HAML
Testing tools: Rspec, Capybara
Databases: PostgreSQL
Version control systems: Git(GitHub)
Task Management Tools: JIRA
Languages: Russian (native), English (intermediate)

EDUCATION

iTechArt Internship – Ruby/RoR 2021
IT Academy – Java Fundamental 2020
Belarusian State Economic University 2022

EXPERIENCE

iTechArt   *October 2021 – Present*

Project#1
The project is a loyalty program aggregator that allows its clients to control marketing campaigns and optimize them.

- Took part in upgrading the RoR version of the project
- Refactored and maintained the feature that allows users to use multiple currencies
- Created automated tests
- Managed and updated front-end of the project: add/change/remove information
- Added and modified API endpoints of the application

Project#2
The project is a CRM-system for recruiters. Project tools and services include the applicant tracking system (ATS) and a recruiting network of search consultants in the United States and Canada.

- Developed front-end and back-end parts of the app
- Participated in the implementation of a third-party API that manages the lifecycle of app's subscriptions
- Mocked the usage of a third-party API in local development
- Maintained existing code base (ex. fix bugs/refactor current code)
- Covered implemented code with test cases (100% test coverage on the project)
